Experience

Associate Frontend Developer – Yeti Nepal Pvt. Ltd

Sept 2025–Present

- Built responsive, reusable UI components using React, Next.js, and Tailwind CSS.
- Integrated Shopify for product display, cart, and checkout functionality.
- Developed backend modules using Node.js and NestJS with modular architecture and dependency injection.
- Built and documented REST APIs with Swagger, including validated CRUD operations.
- Implemented JWT-based authentication and integrated AWS S3 for file storage.

Projects

Fightback Nepal (*Professional Project*)

Next.js, TailwindCSS, TypeScript, NestJS, Prisma, PostgreSQL

Built a full-stack gamified awareness platform with interactive activities, user progression, and rewards. Developed responsive frontend with dynamic UI and complex forms, and scalable backend with NestJS, PostgreSQL, and Prisma ORM. Implemented authentication, RESTful APIs, and API documentation (Swagger). Integrated AWS S3 for media storage, added i18n support.

Custom Maps (*Professional Project*)

Next.js, TailwindCSS, TypeScript, Shopify

Worked on the frontend of a custom map application, implementing interactive features, responsive design, and integrating Shopify services.

Mister Wallpaper (*Professional Project*)

Next.js, TailwindCSS, TypeScript, Shopify

Worked on the frontend for a website, implemented product listing, cart functionality, and order/checkout integration with Shopify. Focused on responsive UI and connecting frontend with Shopify services.

Movie Munch – Movie Discovery Web App

React, TailwindCSS, TMDB API

Built a full-stack movie discovery platform with user authentication, profile management, and movie search. "My List" functionality stored in MongoDB.

Ubay – E-Commerce Website

MERN Stack, TailwindCSS

Developed a scalable e-commerce platform with product management, user authentication, and shopping cart. Backend and API routes implemented.
